

# PixelVerse

Next generation Metaverse NFT ecosystem  
platform for games, communities and  
creators.

 Pitch Deck

# What is PixelVerse?

Pixelverse is a virtual world platform and toolset that lets creators and communities create their own NFTs in a next generation metaverse.

## PixelVerse

Multi-blockchain virtual world that lets users collect, display, interact with NFTs in a shared space.

## PixelBuild

A next generation toolset that lets creators create multi media NFTs across different blockchains.

## PixelCloud

Verified Creators and communities get their own tokens in Pixelverse. Fans and speculators can trade and back up quality and popular creators based on their standing in the Pixelverse.

## PixelLaunch

Launch NFT collections, land sales, hero or weapon sale as well whole projects into the growing Pixelverse ecosystem.

# Cinematic Experience for the Blockchain

## **Virtual shared world with NFT spaces**

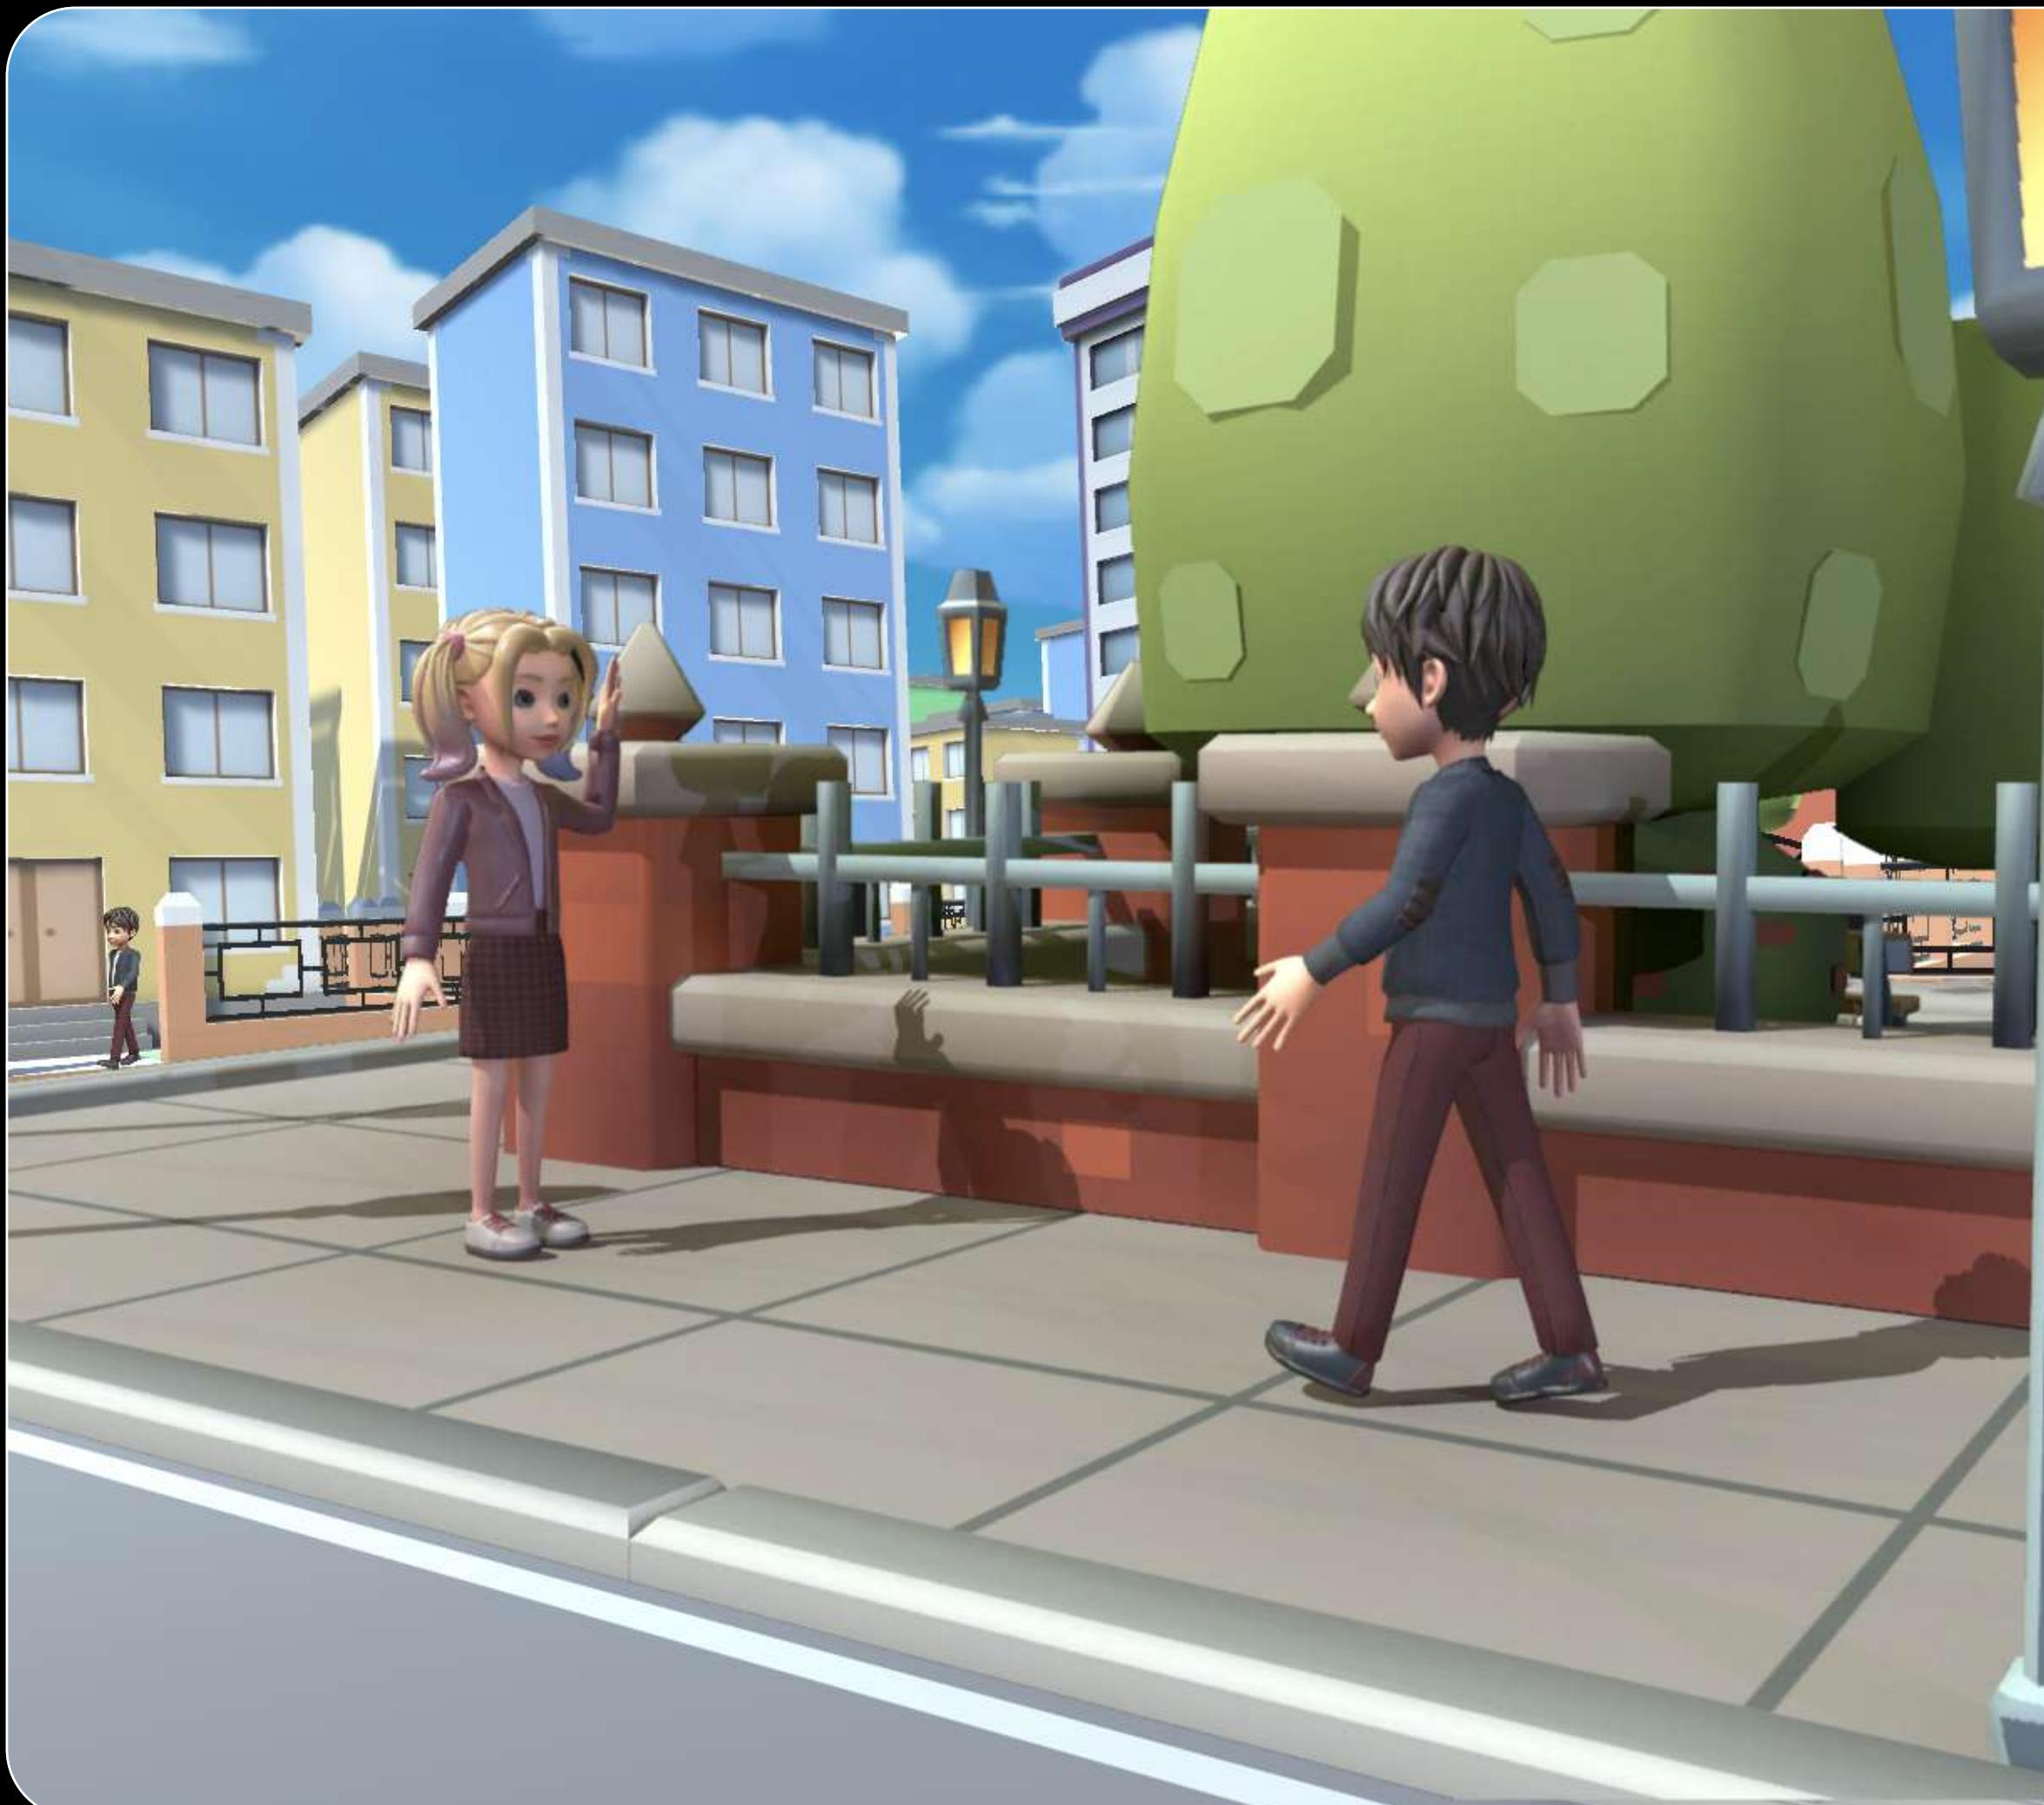

Metaverse land designed for content creators and owners. Using a 3D space based on cartesian coordinates, the virtual land on PixelVerse will be limited in space. Users of the platform will be able to purchase spaces to do virtually anything..

## **Customize your avatar with NFTs**

Users are able to customize their avatars, create items, and monetize their unique items through NFTs. Businesses can easily digitize their physical items to unique items to customize avatars.

## **Private NFT spaces**

Not all users wish to experience the virtual experience with millions of users. PixelVerse allows for users to have customized, private spaces that will allow participants to enjoy with their close friends and family.

# PixelClout

Pixelclout lets established artists, creators and communities claim their page and tokens to provide VIP rooms or holder discounts to their NFT sales.

The screenshot shows the PixelClout mobile application interface. At the top, there is a navigation bar with a search bar, tabs for 'Explore', 'Creator Coin' (which is currently selected), 'My items', 'Following', 'Creators', a balance indicator '479.456 PIXEL', a profile picture, a 'Create' button, and a sun icon. Below the navigation bar, the title 'Creator Coin' is displayed. The main content area is a table listing five creator coins:

Name	Creator	Price
<b>ElonCoin</b> ELC	Elon Musk	\$30,984.54
<b>PerryCoin</b> PRC	Katy Perry	\$20,847.33
<b>SnoopCoin</b> SDC	Snoop Dogg	\$13,231.72
<b>TravisCoin</b> TSC	Travis Scott	\$13,231.72
<b>JustinCoin</b> JBC	Justin Bieber	\$12,685.71
<b>RockCoin</b>	Dwayne Douglas Johnson	\$10,000.00

Each row in the table includes a 'Buy' button on the right side.

## Social Integration

Metaverse land designed for content creators and owners. Using a 3D space based on cartesian coordinates, the virtual land on PixelVerse will be limited in space. Users of the platform will be able to purchase spaces to do virtually anything.

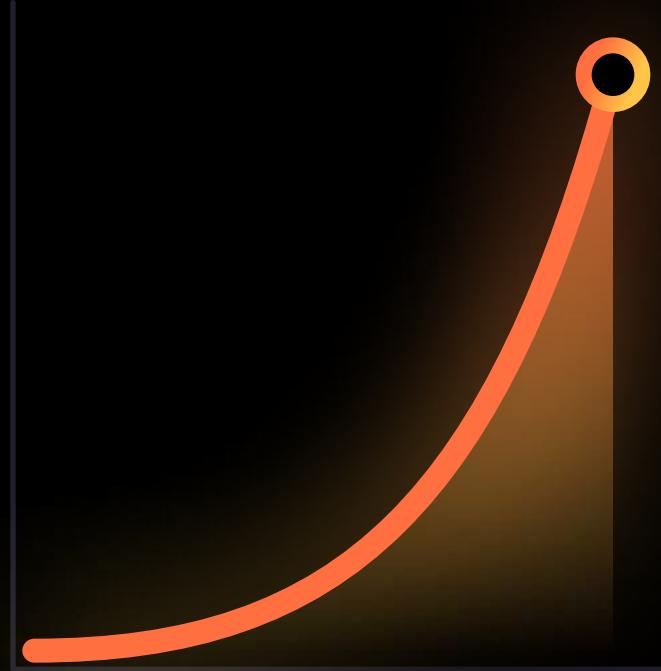

## Personal Customization

Creators are rewarded with 10% of the creator tokens to balance control of the creator tokens. Creators are able to customize benefits of holding creator tokens such as sharing in the NFT sales revenue.

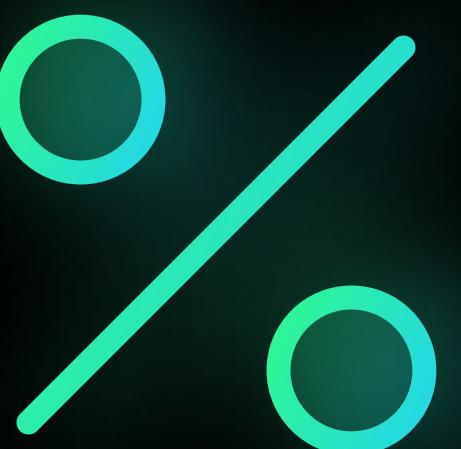

## Private Experience

Not all users wish to experience the virtual experience with millions of users. PixelVerse allows for users to have customized, private spaces that will allow participants to enjoy with their close friends and family.

# Creator Tokens

PixelClout's Creator tokens are designed on a bonding curve to ensure economic fairness to the supporters.

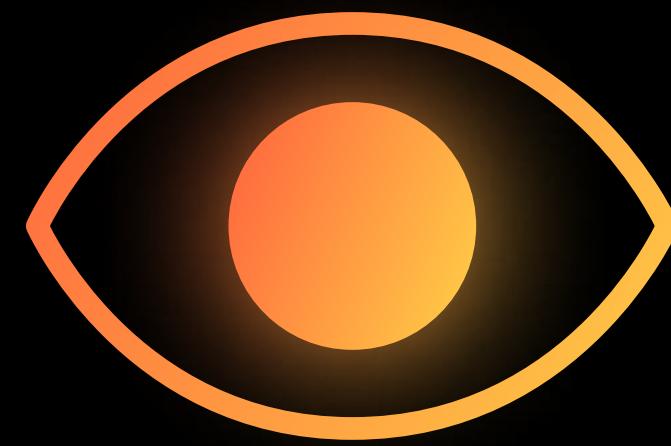

Founders can authenticate their profiles using existing social media to mint a percentage of founders' token.

Each transaction using the fan token has a tax that is shared to PIXEL holders and the creator.

# Fanship turns into an investable asset

Creator tokens are coding agnostic on PixelVerse's platform. Any creator, company, or community can easily issue creator tokens. Now fans can convert their fanship as an investment class. PixelClout will provide the following major features that will be powered by the creator tokens.

# Pixel Technology

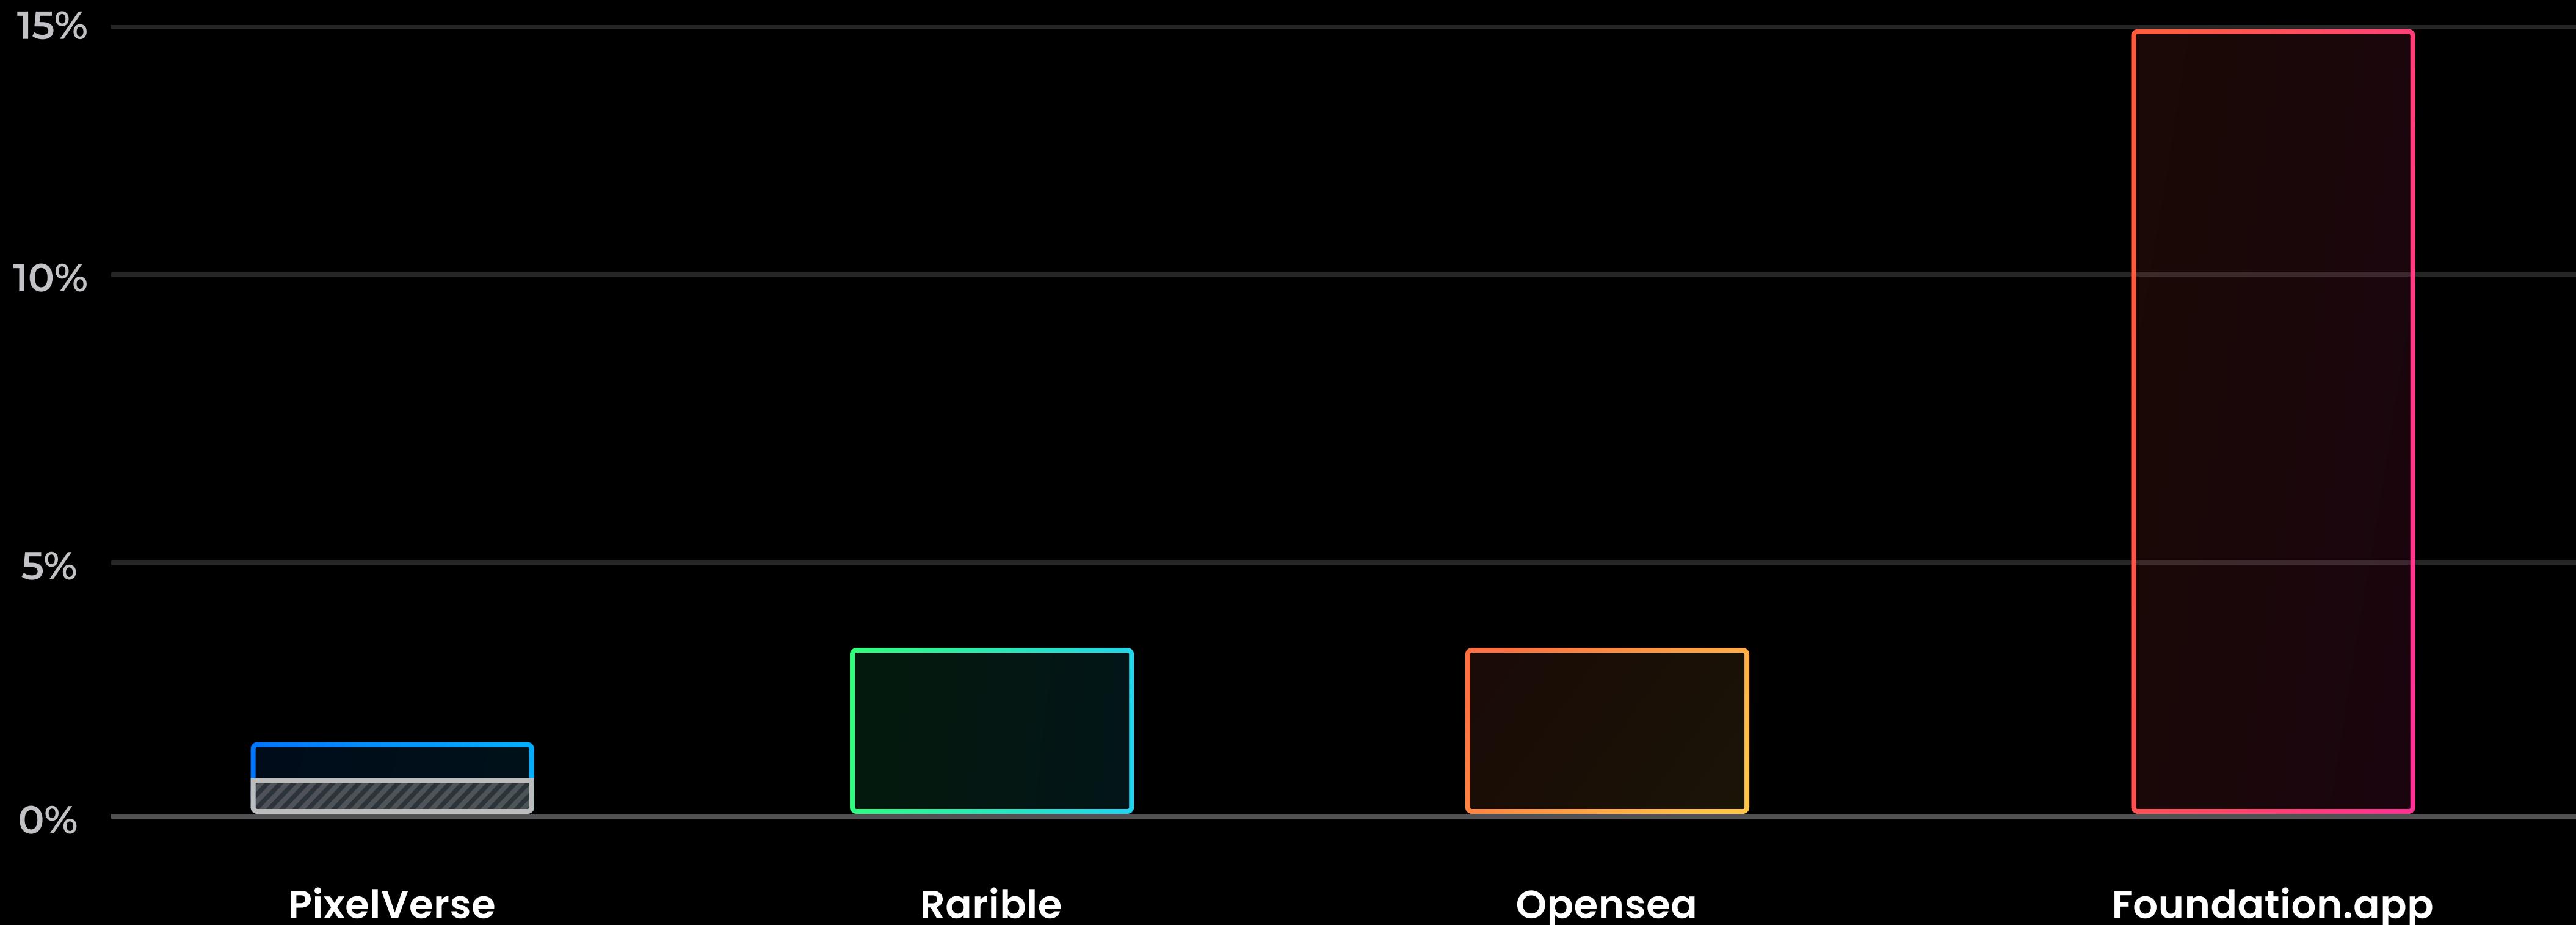

PixelVerse uses a custom built blockchain gateway to interact with different smart contracts to allow users a cross-chain issuance of NFTs.

## PixelVerse - Cross-chain compatible NFT Marketplace Architecture

# NFT Marketplace Seller Fee

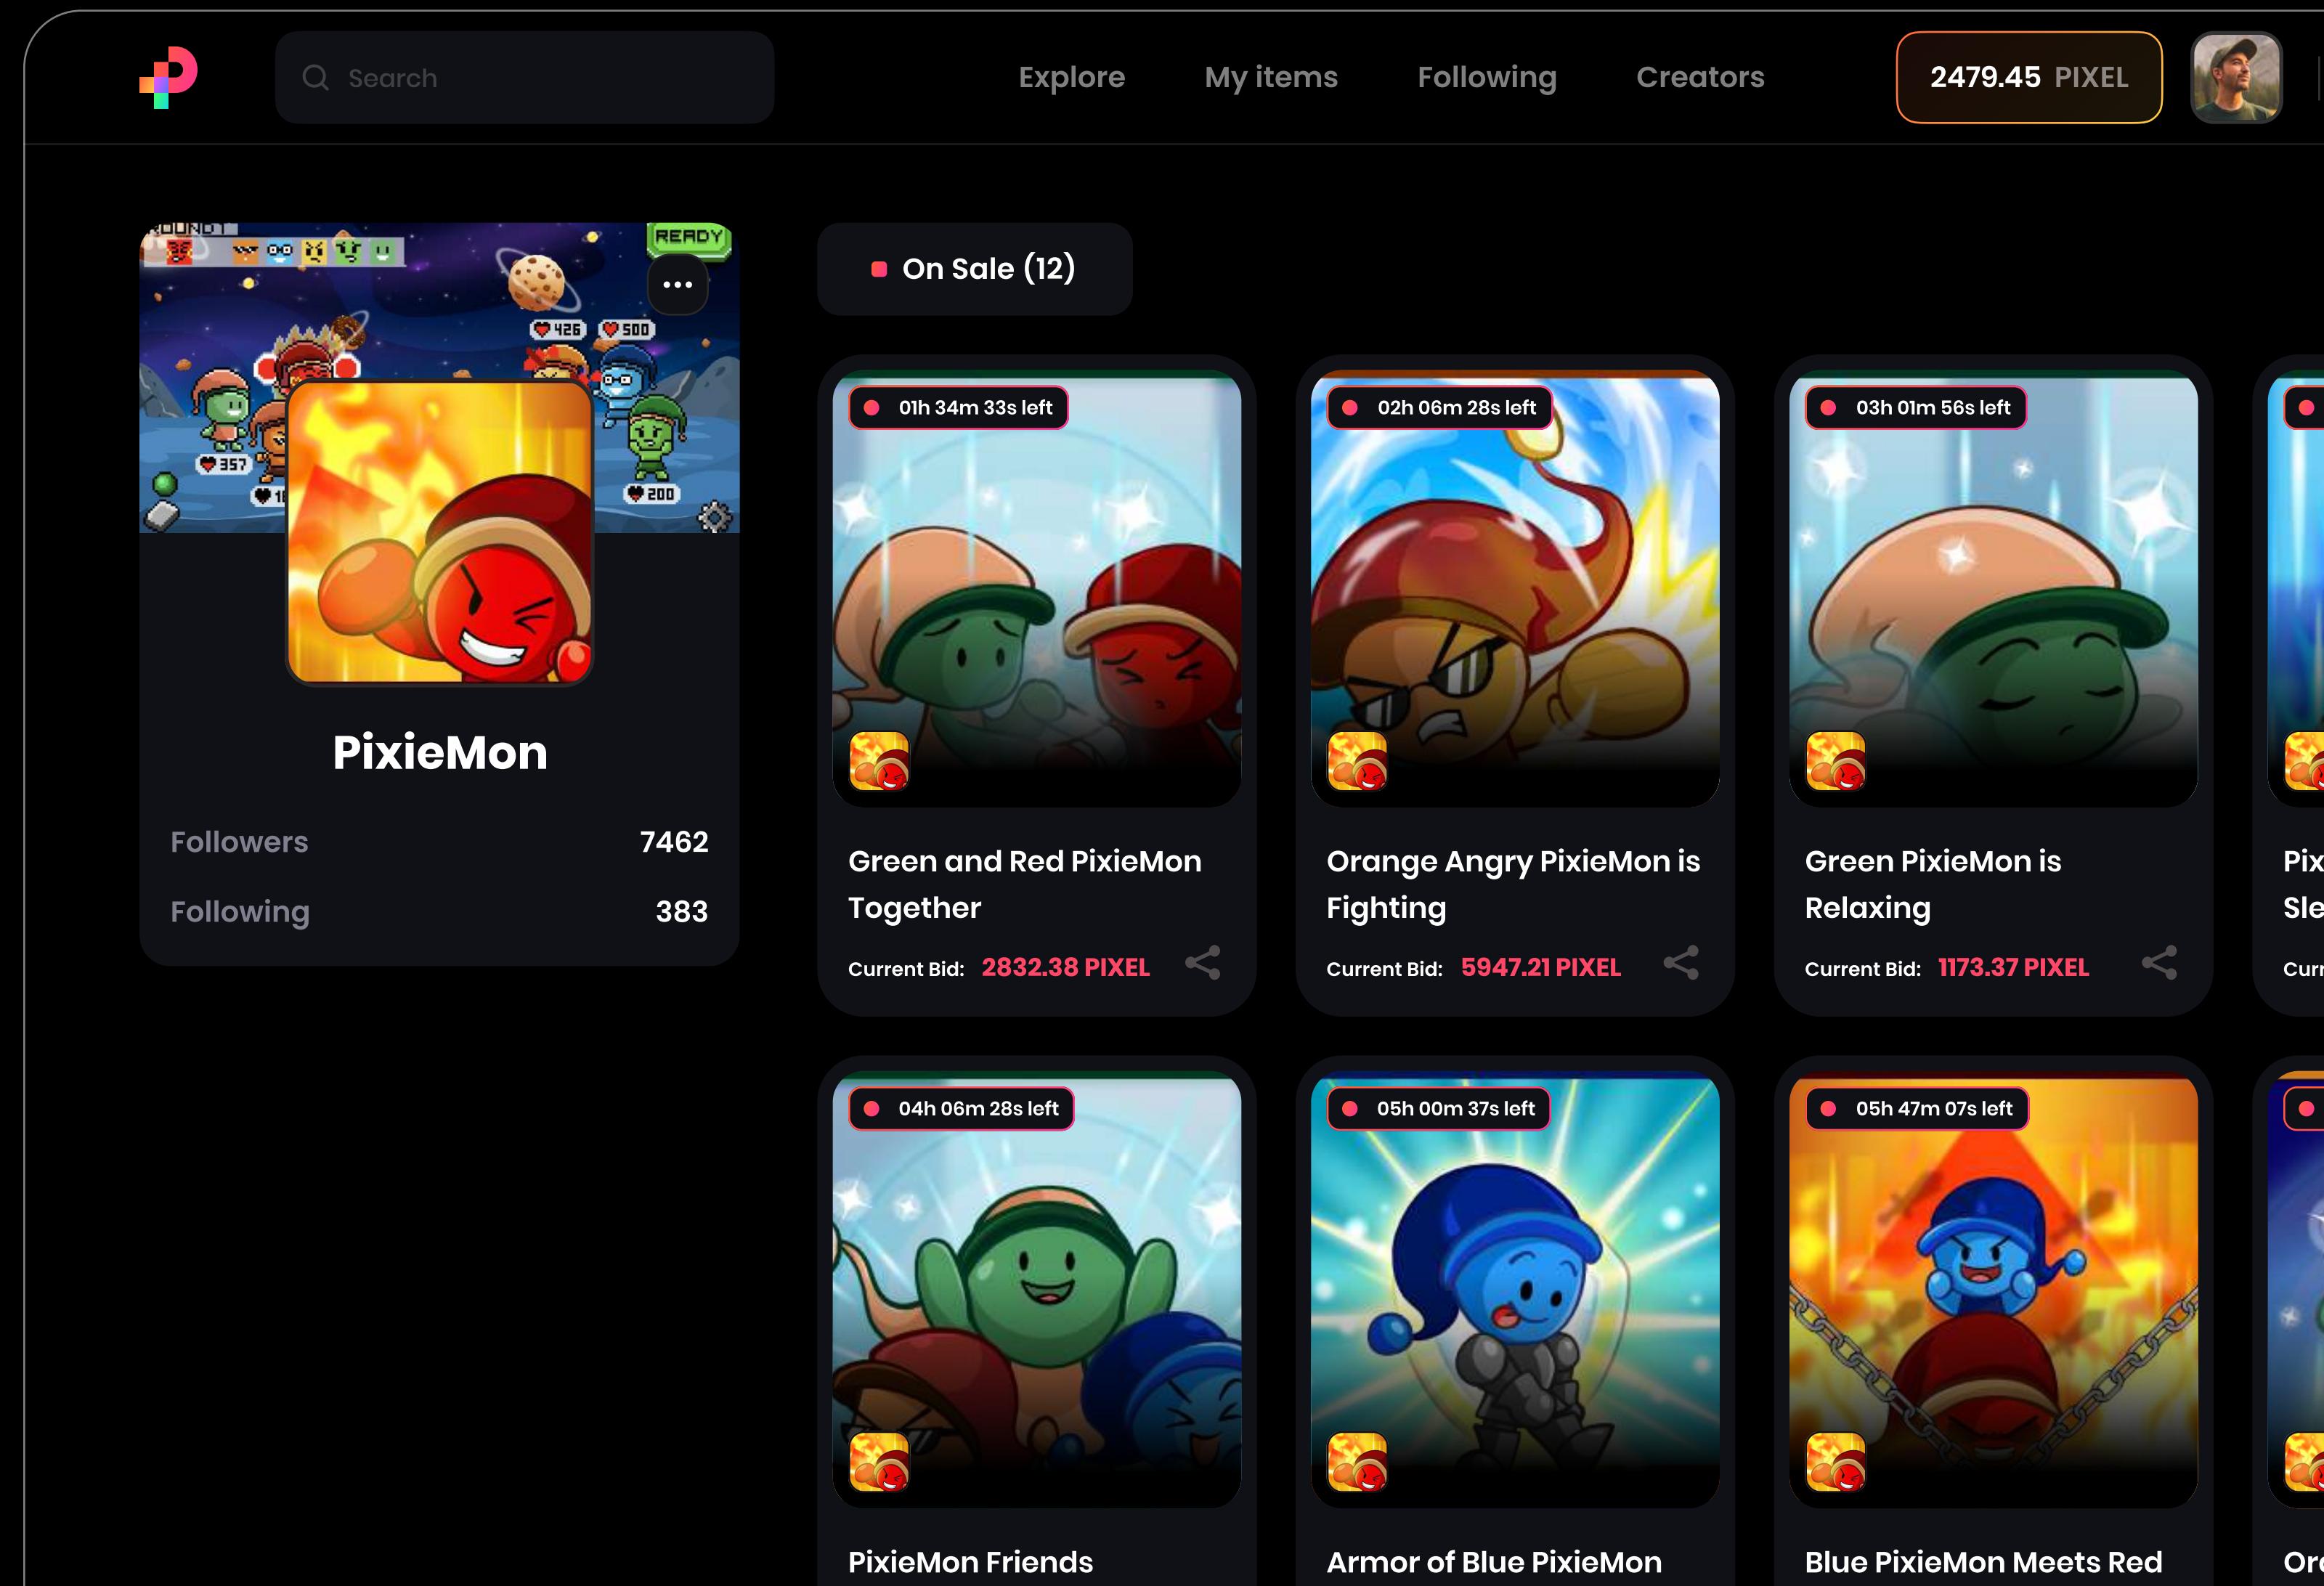

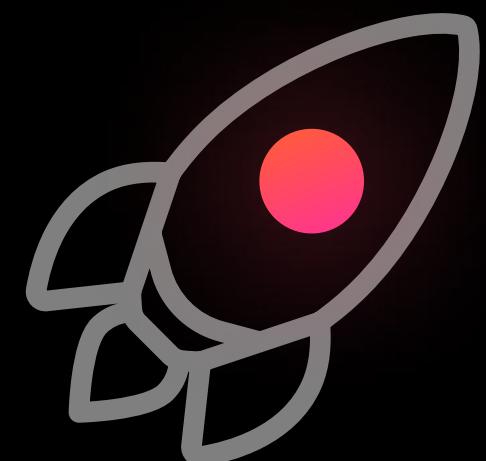

We offer the industry's lowest seller fees at 1.25% to attract more artists to our NFT marketplace. 50% of the fees will be sent to a reserve wallet to buy back and burn PIXEL tokens.

# PixelLaunch

PixelLaunch allows for Metaverse-themed projects and companies to fundraise. PixelLaunch sets new standards and methods for decentralized fundraising in a billion dollar market.

PixelLaunch allows companies to either fundraise either with native tokens or digitized items through NFTs, thus allowing for immediate liquidity instead of traditional equity investments or crowdfunding.

# Purchase Virtual Land

On the PixelVerse NFT marketplace, users can purchase plots of virtual land. On this virtual land, users can have full customization of the virtual land. In addition, users having the genesis land NFTs will have additional PIXEL benefits.

# Pixel Token

PIXEL token powers the PixelVerse platform economy. Users can use PIXEL for governance, payments, mining, and farming.
